This is a multi-tick question asking the person to identify all qualifications obtained. In England and Wales, there is a separate question which records teaching, nursing, medical and dental professional qualifications. These are described in a separate variable. See Qualifications, Professional (PQU(x)PEW). Respondents are asked to tick all boxes that apply.

During processing, the answers to the tick boxes are held in a compound field consisting of 0s and 1s. In order to produce a 'count' of qualifications held, separate variables are provided on the final output database for each qualification group represented by each tick box.

Different questions are asked in England and Wales, Scotland and Northern Ireland to reflect local requirements.

Applicability: All people aged 16 to 74 years, England and Wales

This variable is based on the relationship question which asks the first 5 (6 in Northern Ireland) people in the household to provide information on their relationship with all other members in the household. Persons 6 (Person 7 in Northern Ireland) and over are asked to identify their relationships with Persons 1 and the previous two people only.

During processing the responses to the question are held in a compound field that gives the relationship of that person to all other people in the household. Reciprocal relationships (ie those that are implied by a given relationship) are also held in this field. For example, person 2 is not asked to provide a relationship to person 3, but the relationship can be determined from the relationship to person 2 provided by person 3. The information is used to derive the family variables but is not otherwise used in standard output.

Applicability: All people in households, UK
